### More great news from *Which?*

**We are absolutely delighted to announce that we have just been awarded "Best Buy" by *Which?* magazine, for BroadCall.**

*Which?* have just published the results of their latest survey of Home Phone and broadband bundles. BroadCall was named as the only Best Buy. No other product or provider was good enough! BroadCall from the Utility Warehouse is the best Home Phone and broadband bundle on the market - *Which?* says so!

We scored a customer satisfaction rating of 77% - a massive lead of 20% over our closest competitor. Go to [www.which.co.uk](http://www.which.co.uk) for details (if you're a subscriber) - or look out for the results in the February edition of *Which?* magazine.

Just two months ago, *Which?* named us as the UK's best energy supplier. Now we're best for Home Phone and broadband too.

**BroadCall, Gas and Electricity: all on one bill, all at great value (including unlimited 'free global calls' 24/7), and all brought to you by the UK's best supplier.**

Could it get any better?
